

# 2026 YEAR 2 TERM 2 OVERVIEW

April 20th - June 26th

**In Year 2 this term, we will be learning about:**

## » ENGLISH

Students are creating a written and multimodal informative text based on our space unit. They are researching key facts about space and presenting their ideas clearly through writing, supported by visuals such as images, diagrams, or digital elements. Their work is designed to inform and engage a specific audience while demonstrating their understanding of space concepts.

## » SCIENCE

Students are learning to identify celestial objects and describe patterns they observe in the sky. They explore how people use science in their everyday lives and how patterns help make scientific predictions. Students use tables and graphic organisers to sort and represent data, helping them recognise patterns. They also practise using both everyday and scientific vocabulary to clearly communicate their observations, findings, and ideas.

## » MATHS

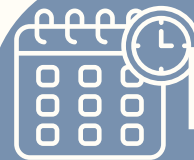

Students are learning to describe and continue patterns that increase and decrease by a constant amount, as well as identify missing elements within these patterns. They are developing their number skills by partitioning, rearranging, regrouping, and renaming numbers up to 999 to support efficient calculations. Students also apply mathematical modelling to solve practical addition problems, particularly those involving money, building their confidence in real-world contexts.

We encourage families to read with their child every day. This can look like: reading a book before bed, and engaging with your child about the book they read and discussing new vocabulary. Conversational Reading, where the adult reads to the child, further extends vocabulary and models fluency when reading is also beneficial at this age. Reading with your child also fosters a curious mindset.

## REMINDERS

- **Home Reading - Gold Coast Public Libraries have a wonderful selection of decodable readers and a range of other books.**
- **Just a reminder: All playgrounds are closed before/after school.**

## DATES

**Under 8's Day**  
Wednesday 20/5  
**Excursion**  
Monday 25/5  
**Junior Athletics**  
Friday 19/6  
**Report Cards - Week 10**
