

2026 YEAR 5 TERM 2 OVERVIEW

20th April - 26th June

In Year 5 this term, we will be learning about:

» ENGLISH

This term students will be exploring information texts about Space related topics. They will identify text structures, language and visual features in information reports and how they support meaning. Students will research different types of technologies that were once designed for Space and are now used on Earth (NASA Spinoffs). Using their research they will then prepare an information report on their chosen technologies.

» MATHS

Students will be investigating number and algebra concepts including factors, multiples, divisibility rules, unknown numbers in numerical equations and efficient strategies to multiply and divide large numbers. They will continue to build on their fluency of multiplication facts. Students will use mathematical modelling to solve financial problems and estimation strategies to check the reasonableness of their answers. They will also learn about converting between 12 hour and 24 hour time.

» OTHER LEARNING AREAS

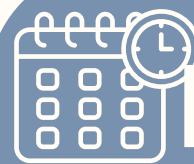

Science - This term students are learning about the key features of our Solar System. They will discuss scientific developments that have affected people's lives and describe details of contributions to our knowledge of the solar system from a range of people.

HASS - Students will examine the influence of people, including First Nations Australians and people in other countries, on the characteristics of places. They will explore the management of Australian environments.

Visual Art - Students will continue to explore concepts of identity and personal development through self-portraits. They will practise and apply a variety of techniques to develop a series of self-portraits in a range of artistic styles.

All students have been issued with their Mathletics log in details. Homework for this term consists of 5 Mathletics tasks each week. Students are also encouraged to be reading a chapter book for 15-30 minutes each night.
